## Visual and Performing Arts Framework for California Public Schools

Kindergarten Through Grade Twelve

**T**he California Department of Education is pleased to announce that the new *Visual and Performing Arts Framework for California Public Schools, Kindergarten Through Grade Twelve*, with an accompanying CD-ROM containing art from California museums, is now available for purchase.

This 2004 edition of the framework is based on the visual and performing arts content standards adopted in January 2001. It incorporates the content standards for dance, music, theater, and the visual arts and defines the five strands of an arts program: artistic perception; creative expression; historical and cultural context; aesthetic valuing; and connections, relationships, and applications.

This framework is especially noteworthy for its inclusion of the multifaceted role of media and electronic technology in the arts. California is an international leader in the technology and entertainment industries; providing students with an education in the arts supports California's future and the economy.

The *Visual and Performing Arts Framework* is a tool for those involved in teaching the arts, including classroom teachers, library media teachers, arts specialist teachers, artists, and community members. 2004, 296 pp.

## California's Nationally Acclaimed Video Training Series for Infant/Toddler Caregivers

Concerned about the quality of available infant and toddler care, the California Department of Education collaborated with WestEd to create a comprehensive training system for center-based and family child care providers. A team of experts in child development, child care, adult education, and print and video production was assembled to work with national and state advisers to create The Program for Infant/Toddler Caregivers (PITC). The goal of The Program is to develop, for trainers and caregivers, meaningful training materials based on sound theoretical principles and proven practices.
